

# Valeriya Filonova

## Junior Front-end Developer

I am a proactive extrovert with an analytical mindset and a fast learner with a desire to grow and develop. I have around 5 years of experience in the field of recruiting and 2 of them as a Recruiting Coordinator. The work in one huge gamedev company opened my eyes to the world of IT and I have decided to explore it and find my true potential by trying my hand out in JS. Looking for a position that will motivate me to be the best version of myself.
